

Heat cable roof clip compatibility

Find the GripClip that fits your roofing material. Start with the material guide or search for your manufacturer and product name.

Roofing material	Recommended clip
Asphalt shingles	GripClip 325
Cedar shingles and tapersawn Cedar shakes up to 5/8 inch	GripClip 625
DaVinci synthetic slate	GripClip 625
Heavy hand-split Cedar shakes and 3/4-inch tapersawn Cedar shakes	GripClip 875
Brava and CeDUR synthetic shakes	GripClip 875

GripClip™ roof clips secure heat cable without penetrating the roofing surface. Three sizes accommodate different roofing materials and profiles.

GripClip 325

GripClip 325 roof clips secure heat cable and heat tape to asphalt shingles without penetrating the roofing surface. Used in roof and gutter ice dam prevention systems, these clips hold cable in position to help maintain drainage paths for melting snow and ice. Find your shingle manufacturer and product below to confirm compatibility.

Specification	GripClip 325
Model number	IDP-GPA-325
Roofing material thickness	1/8 to 3/8 inch
Nominal mouth height	3/8 inch
Overall length	86 mm
Material and finish	1.2 mm 5052 black anodized aluminum
Pack sizes	5 or 25 pieces

Mouth heights are nominal. Overall lengths are shown in millimeters.

GripClip 625

GripClip 625 roof clips secure heat cable and heat tape to Cedar shingles, tapered Cedar shakes up to 5/8 inch thick and DaVinci synthetic slate. These clips provide a fastening option without roof penetrations for ice dam prevention systems on compatible roofing materials. Check the compatibility list below to select the right clip for your roof.

Specification	GripClip 625
Model number	IDP-GPA-625
Roofing material thickness	3/8 to 5/8 inch
Nominal mouth height	5/8 inch
Overall length	92 mm
Material and finish	1.2 mm 5052 black anodized aluminum
Pack sizes	25 pieces

Mouth heights are nominal. Overall lengths are shown in millimeters.

Material compatibility

Manufacturer / material	Roofing product / profile	Compatible clip
Cedar	1/2-inch tapered shakes	GripClip 625
Cedar	Red and white Cedar shingles	GripClip 625
DaVinci	Synthetic slate	GripClip 625

GripClip 875

GripClip 875 roof clips secure heat cable and heat tape to thicker roofing materials, including heavy hand-split Cedar shakes, 3/4-inch tapersawn Cedar shakes, Brava synthetic shakes and CeDUR synthetic shakes. They hold roof deicing cable in position without penetrating the roofing surface, supporting ice dam prevention systems on these roof types.

Specification	GripClip 875
Model number	IDP-GPA-875
Roofing material thickness	5/8 to 7/8 inch
Nominal mouth height	7/8 inch
Overall length	100 mm
Material and finish	1.2 mm 5052 black anodized aluminum
Pack sizes	25 pieces

Mouth heights are nominal. Overall lengths are shown in millimeters.

Material compatibility

Manufacturer / material	Roofing product / profile	Compatible clip
Brava	Synthetic shakes	GripClip 875
Cedar	Heavy hand-split shakes	GripClip 875
Cedar	3/4-inch thick tapersawn shakes	GripClip 875
CeDUR	Synthetic shakes	GripClip 875
